

One more puzzle for the road ...

Solve the crossword to learn a question appropriate to the weekend you just finished, then cut out and rearrange the five pentasquare shapes into a 5x5 square to learn the 5-word answer. Orientation of the letters within the pentasquares does not matter — you will need to rotate and/or flip the pieces to assemble them into the proper square. Note: you can solve without cutting out the pieces — it's just a bit more fun if you do.
